CST Student Training Update

Student Mapping is Complete for CST Access

- o Students and Clinical Instructors currently at CW or those starting at CW post Go-Live will begin receiving their CST Learning Journeys this week via their academic emails.
- o Curriculum for all Non-Provider students will consist of eLearning and self-directed online learning (SDOL) specific to their role. They do not attend Work flow reviews (WFRs).
- o Students will require access to a Patient Data Profile (PDP) to complete their SDOL workbook. Each SUD area will need to dedicate and coordinate a PDP for student learning that will need to be shared among students and Instructors.
- o Instructors who are not staff are welcome to attend WFRs if there is space. This is not required but would be helpful.
- o Provider students (Physicians/Residents/MSIs, Nurse Practitioners and Midwives) will be required to complete eLearning, SDOLs, and WFRs.

Clinical areas not going live with CST

- o Some students coming to us will be working with clinic areas that are not going live with CST Cerner on February 26. These students will require dual access to both CST Cerner and Legacy Cerner (PowerChart) systems.

Non-Provider Student/Instructor CST Training Steps

1. The CST Learning Team accesses placement information in HSPnet and enrolls students/Instructors into their specific CST curriculum.
2. The CST Learning Team emails learning journeys to each student/Instructor, via their academic email.
3. Students/Instructors review their learning journey, which contains information and instructions on how to complete training, and begin their CST training using the links provided.
4. Students/Instructors will be given access to CST Cerner for the duration of their placement
5. Questions relating to learning journeys should be directed to learn@cstproject.ca.

** Future Students will receive these CST training emails 4 weeks prior to their placement. Schools must have Student/Instructor information into HSPnet at a minimum 6-8 weeks prior to placement.

Communication has been shared with our academic partners and updated communication is being sent this week to those academic programs with students who are currently at CW or who will be starting at CW post Go-Live.
