Provincial Language Service Interpretation Criteria:

- ☐ Patient will be asked to sign an **informed consent** for treatment/procedure *and* the patient is not fully fluent in English.
- ☐ Patient has little or no English language skills *and* has no responsible adult friend/family member to translate for them during the clinical encounter. Note: Children are not suitable translators for patients.

The Provincial Language Service comes with significant cost.

If your patient has basic English language skills and can manage their own appointment that does not include consent, diagnosis, or treatment, do not request an interpreter.

All information and medical terminology should be explained in simple English so the use of an interpreter is not necessary for most appointment types.

Should we determine there is in fact a need, we will access interpretation support via telephone which is an effective modality for interpreting health care as indicated in the most recent literature and current best practices.

Thank you for your cooperation and support.

Oak Tree Clinic,

BC Women's Hospital & Health Centre
